Career Objective

Seeking a challenging as well as rewarding position that utilizes my skills and knowledge which will enhance the organization success and continuously update my knowledge base with the latest technologies and opportunities to go beyond the boundaries without compromising my ethics while being resourceful, innovative, and flexible.

Professional Summary

- Having Around 5 years of experience in Oracle WebLogic and IIS and Cloud AWS Servers Administration for various environments on Linux.

- Handled all the aspects of Installation, Configuration, Troubleshooting and Load Balancing, Clustering, Deploying Applications, Performance Tuning and Maintenance of WebLogic Server versions 12c.

- Installed Web Logic on LINUX Environments using GUI, console and silent modes.

- Configure WebLogic Servers in a Cluster environment solution for High Availability, Load balancing and fail over support.

- Experience in setting up Multiple Domains, Managed Servers, and Machines in different cluster environments.

- Proficient in deployment of various Applications (WAR and EAR) in domain and clustered environments of WebLogic server by using the tools like admin console, WebLogic. Deployer utility.

- Configuring the JDBC & JMS resources in web logic.

- Configuring of Data sources, Pool Connections and troubleshooting to fixing up problems.

- expertise in Installation and Configuration of **Apache HTTP** Webserver.

- Experience in configuring and managing secured environments using SSL and digital certificates.

- Troubleshooting and Monitoring the Performance by tuning JVM heap size and garbage collection parameters.

- Good in analyzing the thread dumps by using the tools like Samurai.

- Good experience on basic UNIX commands.

- Excellent problem-solving skills with good interpersonal skills.

- Provided 24/7 production support and coordinated with business, developers, management, and end-users to resolve critical issues.

Technical Skills

- Application Servers	:	WebLogic, Application Server 11g,12c
- Web Servers	:	Apache HTTP Server 2.4,IIS
- Operating Systems	:	Linux, Windows.
- Protocols	:	Http,Https,Ftp and TCP/IP
- Database	:	Oracle 12c/19c.

- Tools   : Putty, WinSCP, BMC Remedy, Samurai, MAT.
- Cloud   : AWS

Professional Experience

- Working as software engineer with CUBESPACE TECHNOLOGIES PRIVATE LIMITED since March 2019 to as of now.

Education Qualification

- **BSC (M.S.C.S)** from **Yogi Vemana University** in **2019**

Project Details

#2Project

Client	:	Ocwen
Duration	:	April 2021 to till date.
Environment	:	WebLogic 10g, Apache 2.2, Oracle 10g, Linux, Remedy
Role	:	System Analyst.

Roles and Responsibilities:

- Installation, configuring, administration of Web Logic 11x and 12c on Oracle Linux environment.
- Provided support for all applications in Production and non-production environments.
- Resolving runtime issues in the environments.
- Web Logic administration includes: availability of service, deployments, node administration through admin Console.
- Configure Managed Servers in a Cluster solution for High Availability, Load balancing and fail over support
- Upgrading the Web Logic domains.
- Monitoring Server Health Check and Resolving Alerts.
- Deploying the J2EE application with the Console, WebLogic. Deployer utility
- Configuring database connection pools and data sources
- Creation of JMS Servers, Persistence Stores, Queues and Topics
- Creation and renewal of SSL certificates
- Configuration of the Web Logic resources like JDBC data source, connection pool
- Deployment of Web-applications in Web Logic instances
- Communicating with the client, Testing Team & Development Team.
- Providing 24/7 support for concert applications.

#1Project

Client	:	3M UK
Duration	:	May 2019 to March 2021.
Environment	:	WebLogic Application Server, Apache Web server, Oracle10g, Linux
Role	:	System Analyst.

Roles and Responsibilities:

- Installation, configuring, administration of WebLogic 12x on Linux environment.
- Troubleshooting the middleware issues and resolving the P2,P3 tickets within SLA
- Application deployment using admin console.
- Provided on call support on 24/7 basis
- Installed, configured and administration to WebLogic 12.x, JDBC Data source and Connection pool configuration with Oracle. Web Logic Administration, Monitoring and Troubleshooting using Admin Console.
- Have excellent experience in Client Interaction
- Involved in creation and configuration of Domains, JVM instances in production, QA and UAT environments.
- Configured clusters to provide failover, load balancing and deployed applications on clusters.
- Installed, configured and administration to Apache 2.4
- Provided on call support for production tickets on 24/7 basis.
- Monitoring the alerts and responding to them within 15 minutes.
- Deployment of web and enterprise applications and their updates in production, pre-production using Admin console.
